SUMMARY

I'm a BCA student with a growing passion for UI/UX design and creating digital experiences that feel simple, clear, and enjoyable. I enjoy working with tools like Figma to design wireframes and prototypes, and I'm always curious about how small details in design can improve the overall user journey. As a fresher, I'm excited to learn from real projects, explore user-centered design practices, and contribute creative ideas to build meaningful products.

PROFESSIONAL SKILLS

Problem Solving
Strong communicate
Creativity

Public Speaking
interpersonal skills
Time Management
